

Aladdin – eToken NG-FLASH

SecureWave Certification Number: CERT-SDC-06-08-00014

Aladdin's eToken NG-FLASH combines the high security of a smart-card-based USB authentication device with the benefits of flash memory. eToken NG-FLASH provides the most extensive range of capabilities in a single device. It enables secure access to networks and applications, secure online transactions, data encryption, PC boot protection, secure credential storage, mobile mass data storage, and more – all in one compact USB token.

Major features include:

- > Strong two-factor authentication: requires both the token itself and the token password
- > Highly secure implementation using smart card chip
- > Public key infrastructure (PKI) support, with on-board RSA 1024-bit and 2048-bit PKI key generation, authentication, and digital signing
- > Secure storage of user passwords and cryptographic keys
- > Flash memory for mass data storage (128MB, 512MB, or 1GB)
- > Auto-run feature – enables solution providers to pre-load applications that automatically run directly from the token

Sanctuary Device Control

Sanctuary® Device Control extends the enforcement of enterprise policies to I/O devices. Users can access only explicitly authorized devices, such as Aladdin eToken NG-FLASH. Sanctuary Device Control manages this by applying an Access Control List (ACL) to each device type. To grant access, the administrator need only associate user or group objects to the authorized device.

Sanctuary Device Control supports several directory platforms, including Microsoft Active Directory and Novell eDirectory. Sanctuary has also been ported to Windows Embedded platforms in addition to the Windows Server and Desktop versions. Sanctuary Device Control:

- > Ensures USB Security through management of any removable media,
- > Provides complete control and management over all I/O devices through any port including USB, Firewire, WIFI, Bluetooth, etc.,
- > Prevents data theft and data leakage via removable media,
- > Prevents malware introduction via removable media,
- > Audits I/O Device usage,
- > Detects and blocks Keyloggers,
- > Encrypts removable media adding data security to Aladdin eToken NG-FLASH USB media,
- > Enables Regulatory Compliance with enforceable policies that include extensive logging and auditing,
- > Provides centralized logging and retention of an exact copy of all data written to authorized devices using SecureWave's proprietary Shadowing™ technology.

Aladdin eToken NG-FLASH brings an integrated secured solution to enterprises with one-time password, smart card technology, digital certificates and flash memory on a single device. When coupled with Sanctuary Device Control, enterprises can enforce policy usage of eToken NG-FLASH devices throughout the organization making sure no other devices can be used for authentication and mobile storage while ensuring data encryption on the device and protection from hardware keyloggers and data leakage.

SECUREWAVE SANCTUARY CERTIFIED DEVICE

SecureWave Sanctuary® provides policy-based control over endpoint applications and devices. Using an automated whitelist approach, Sanctuary enables the development, enforcement, and auditing for application and device use in order to maintain IT security, reduce the effort and cost associated with supporting endpoint technologies, and ensure compliance with regulations. Sanctuary links application and device policies to Microsoft® Active Directory™ or Novell® eDirectory® user and user group information, dramatically simplifying the management of endpoint application and device resources. More than 1,300 enterprises worldwide in the financial, government, military, manufacturing and healthcare sectors utilize Sanctuary. SecureWave, named a Red Herring Top 100 Innovator, is headquartered in Luxembourg and services its global customer base via offices in the U.K., Washington D.C. and Research Triangle Park, N.C., as well as a network of reseller and service provider partners worldwide.
