BlockMaster – SafeStick[®] Business

SecureWave Certification Number: CERT-SDC-07-02-0026

SafeStick[®] business edition adds security to the SafeStick[®] USB Flash Drive. It is a premier security solution utilizing high end flash and secure USB technology. SafeStick is capable of handling tough operations in high demand organizations. It works without prior installations, does not require administrator privileges and is the perfect tool for transferring and handling business critical information, imperative for today's mobile workforce. The combination of hardware and software security protection coupled with upgrade functionality makes SafeStick the logical choice due to its cost efficiency, long product lifespan and top of the line security. SafeStick is intuitive, easy to use and provides amongst other features:

- > Always Secured – protected by password and encryption (AES128)
- > Automatically locked if left in computer for too long or user logs out from the host system
- > Password strength can be set to comply with company password policy
- > Hardware evaluation of passwords
- > Brute force protection of information with auto-reset
- > End-user not able to deactivate password protection, upholds policy
- > Advanced hash processing of passwords
- > Ability to use pass phrases
- > Secure wipe mechanism, ensuring complete erasure of data during reset

Sanctuary Device Control

Sanctuary[®] Device Control extends the enforcement of enterprise policies to I/O devices. Users can access only explicitly authorized devices, such as BlockMaster's SafeStick[®] business. Sanctuary Device Control manages this by applying an Access Control List (ACL) to each device type. To grant access, the administrator need only associate user or group objects to the authorized device.

Sanctuary Device Control supports several directory platforms, including Microsoft Active Directory and Novell eDirectory. Sanctuary has also been ported to Windows Embedded platforms in addition to the Windows Server and Desktop versions. Sanctuary Device Control:

- > Ensures USB Security through management of any removable media,
- > Provides complete control and management over all I/O devices through any port including USB, Firewire, WIFI, Bluetooth, etc.,
- > Prevents data theft and data leakage via removable media,
- > Prevents malware introduction via removable media,
- > Audits I/O Device usage,
- > Detects and blocks Keyloggers,
- > Encrypts removable media to USB devices that may not provide their own encryption mechanism,
- > Enables Regulatory Compliance with enforceable policies that include extensive logging and auditing,
- > Provides centralized logging and retention of an exact copy of all data written to authorized devices using SecureWave's proprietary Shadowing[™] technology.

The combination of SecureWave's and BlockMaster's solutions help safeguard a company's intellectual capital. Never before have organizations had the opportunity to enforce policy for USB flash drives and maintain the flexibility and productivity that is only available by effectively incorporating new technology into the enterprise.

SECUREWAVE SANCTUARY CERTIFIED DEVICE

SecureWave Sanctuary® provides policy-based control over endpoint applications and devices. Using an automated whitelist approach, Sanctuary enables the development, enforcement, and auditing for application and device use in order to maintain IT security, reduce the effort and cost associated with supporting endpoint technologies, and ensure compliance with regulations. Sanctuary links application and device policies to Microsoft® Active Directory™ or Novell® eDirectory® user and user group information, dramatically simplifying the management of endpoint application and device resources. More than 1,600 enterprises worldwide in the financial, government, military, manufacturing and healthcare sectors utilize Sanctuary. SecureWave, named a Red Herring Top 100 Innovator, is headquartered in Luxembourg and services its global customer base via offices in the U.K., Washington DC, as well as a network of reseller and service provider partners worldwide.
