

## Kanguru – Kanguru Flash Drive (KFD)

SecureWave Certification Number: CERT-SDC-06-06- 00008

The new, sleek Kanguru Flash Drive holds an incredible amount of storage in a tiny form factor! Just slightly larger than a quarter, the Kanguru Flash Drive is a compact USB2.0 flash drive that offers storage capacities up to 8GB. Half the size of the Kanguru Mini Drive, this compact and lightweight device allows for ultimate portability. It operates on Windows, Mac and Linux, most without any device drivers.

The Kanguru Flash Drive comes complete with KanguruShield security software, allowing Windows users the option of password protection for secure data. The KanguruShield software allows users to resize and format the flash drive space into public and/or private partitions. Setting up the KanguruShield security software is easy and user friendly!

Major features include:

- > 50% Smaller than the Kanguru Mini Drive
- > Compact and lightweight design, weighs only 13 g
- > Store up to 8GB!
- > High speed USB2.0 (480mbps)
- > Uses Top Grade Flash Memory, 10 year data retention
- > Backwards compatible with USB1.1 ports
- > Plug and Play!

## Sanctuary Device Control

Sanctuary<sup>®</sup> Device Control extends the enforcement of enterprise policies to I/O devices. Users can access only explicitly authorized devices, such as Kanguru Flash Drive. Sanctuary Device Control manages this by applying an Access Control List (ACL) to each device type. To grant access, the administrator need only associate user or group objects to the authorized device.

Sanctuary<sup>®</sup> Device Control supports several directory platforms, including Microsoft Active Directory and Novell eDirectory. Sanctuary has also been ported to Windows Embedded platforms in addition to the Windows Server and Desktop versions. Sanctuary Device Control:

- > Ensures USB Security through management of any removable media,
- > Provides complete control and management over all I/O devices through any port including USB, Firewire, WIFI, Bluetooth, etc.,
- > Prevents data theft and data leakage via removable media,
- > Prevents malware introduction via removable media,
- > Audits I/O Device usage,
- > Detects and blocks Keyloggers,
- > Encrypts removable media adding data security to Kanguru Flash Drive (KFD) media,
- > Enables Regulatory Compliance with enforceable policies that include extensive logging and auditing,
- > Provides centralized logging and retention of an exact copy of all data written to authorized devices using SecureWave's proprietary Shadowing<sup>™</sup> technology.

Combine the security access features of Kanguru Flash Drive (KFD) with Sanctuary Device Control to make it a secured device with encrypted data while enforcing corporate policies regarding device usage, denying any unauthorized media and other devices by default.

SecureWave Sanctuary® provides policy-based control over endpoint applications and devices. Using an automated whitelist approach, Sanctuary enables the development, enforcement, and auditing for application and device use in order to maintain IT security, reduce the effort and cost associated with supporting endpoint technologies, and ensure compliance with regulations. Sanctuary links application and device policies to Microsoft® Active Directory™ or Novell® eDirectory® user and user group information, dramatically simplifying the management of endpoint application and device resources. More than 1,300 enterprises worldwide in the financial, government, military, manufacturing and healthcare sectors utilize Sanctuary. SecureWave, named a Red Herring Top 100 Innovator, is headquartered in Luxembourg and services its global customer base via offices in the U.K., Washington D.C. and Research Triangle Park, N.C., as well as a network of reseller and service provider partners worldwide.
